OUR COMMITMENT TO THE ENVIRONMENT

Sodeca has begun a new stage of study and design of new trends in ventilation which will help to preserve the environment and to make the energy saving which so much concerns today's society.

EFFICIENT WORK

SODECA is pleased to present its new efficient, high performance "**Efficient Work**" fans, equipped with high-tech motors for greater energy savings. These new products exceed the requirements of the Ecodesign ErP Directive of 2009/125/CE and the (EU) regulation 327/2011 governing fans and adhere to the KYOTO goals adopted by the EU for cutting greenhouse gas emissions.

SODECA has concentrated its activity on the production of industrial fans, ventilation systems and extractors for the removal of smoke in case of fire since 1983, when it was founded.

SODECA's fans and extractors are present in all European countries and in many parts of the world, thanks to the quality of the product and the methods of research and development used.

Our quality procedures, used and certified by BUREAU VERITAS, in accordance with ISO 9001:2008, are another of the reasons which make **SODECA** one of the best and most renowned fan manufacturers in Europe.

Without a doubt, the most important factor for achieving our objectives is the human factor, the great professionals who work at your service, offering not only ventilation equipment but also solutions to any ventilation need required by our customers.

We offer you the possibility of visiting our facilities in Sant Quirze de Besora, with over 16,000² square metres of built area, where you will be able to see our fans being manufactured to the highest standards of quality, complying with the ISO and AMCA standards.

This catalogue only represents a small part of our product and services offering. Do not hesitate to contact us. We will put all our experience and our human resources at your disposal.

SODECA S.L.U. main facilities in E-08580 SANT QUIRZE DE BESORA

ATEX EXPLOSIVE ATMOSPHERES

All SODECA fans and extractors for explosive atmospheres comply with the requirements of the European Directive 94/9/EC and have been designed to comply with the EN-14986 Standard "Fan design for working in potentially explosive atmospheres". Product quality is thus guaranteed, and maximum safety levels are ensured for people and facilities.

CERTIFICATES ATEX EXPLOSIVE ATMOSPHERES

EAC

Fan Design:

In compliance with the EN-14986 standard, and to prevent ignition in the event of friction or impact between the mobile and static parts, they are manufactured using materials that can be paired, in order to prevent any possible sparks.

Centrifugal fans:

To prevent sparks generated by the turbine:

- . Copper inlet
- . Protective caps to protect screwed/riveted joints
- . Distances between components are checked

Axial fans:

- To prevent sparks generated by the impeller:

- . Copper or aluminium coating on the inner face of the ring
- . Distances between components are checked

In compliance with regulations, all the parts of the fan that are not soldered together and are fixed mechanically using other systems, or are different parts that are coated with paint that may insulate the conductivity, are connected together by earthed wires, in order to prevent any differences in potential between these parts that are not soldered or painted.

Since its founding, Sodeca has specialised in the design and manufacture of fans and accessories for industrial applications.

The combination of our experience - acquired over decades of working with fans - and the technological contributions of our engineers from different departments has made it possible for Sodeca to become one of the largest manufacturers of industrial ventilation in the world.

Industrial applications demand the ability to adapt to the specifications of each project as well as manufacturing flexibility so as to satisfy the real needs of each client.

In order to meet this objective, Sodeca produces a range of Standard products and a range of specially manufactured products in order to build fans that adapt to the demands of our clients.

For the various projects we can use motors that comply with the market's most demanding regulations:

NEMA super premium efficiency

NEMA premium efficiency

NEMA high efficiency

U.L. motors

C.S.A. motors

Extractors for ATEX EXPLOSIVE ATMOSPHERES

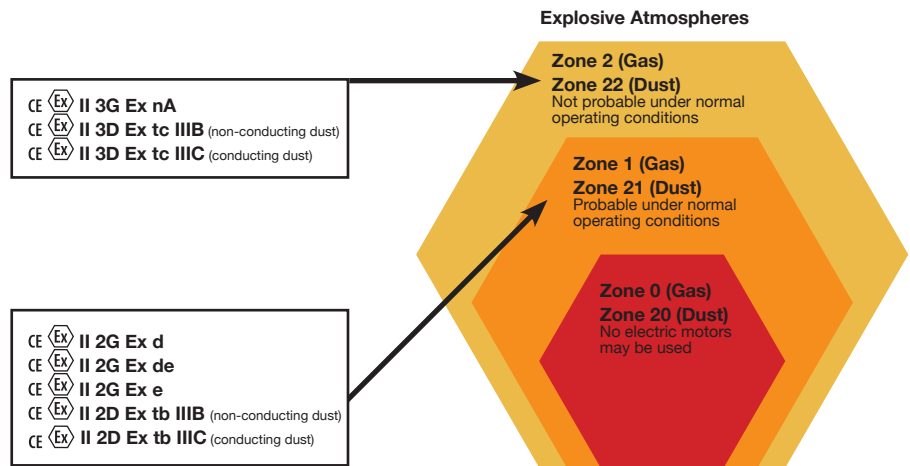

An ATEX zone has a mixture of air with flammable **gas, vapour, mist** and/or **powder**, which if it caught fire would all burn immediately.

Flame and explosion limits for gases:	
LEL	Lower Explosive Limit » % volume.
UEL	Upper Explosive Limit » % volume.
MIE	Minimum ignition energy » 10-6 μ Joules
Flash Point	Lowest temperature at which vapours of a fluid will ignite
Autoignition Temperature	Temperature at which a gas spontaneously ignites
Temperature	(T1, T2, T3, T4, T5 and T6)

Flammability of solids:	
LEL or MEC	Minimum Explosible Concentration (MEC) » g/m ³
LOC	Limiting Oxygen Concentration (LOC) » % volume
MIE	Minimum Ignition Energy » 10-3 μ Joules
MIT	Minimum Ignition Temperature in °C: – In a cloud MIT n (dust cloud in contact with a hot surface). – In a layer MIT c ignition of a 5 mm-thick layer. – (T limit is the lower of: 2/3 of MIT n or MIT c -75°C)

Summary of Zone Definitions

Zone Definitions:

- Gases and vapours/Dust:
- **Zone 0/Zone 20:**
Continuously present, present for long periods or frequently.
No electric motors may be used.
 - **Zone 1/Zone 21:**
Probable under normal operating conditions
 - **Zone 2/Zone 22:**
An ATEX zone is not likely to occur under normal operating conditions

Equipment Groups and Categories:

- GROUP I: equipment for use in underground parts of mines or in surface installations endangered by firedamp and/or combustible dust.**
- Category M1: required to remain functional
 - Category M2: must be able to be de-energised
- GROUP II: Other danger zones**
- Category 1: very high level of protection. Zone where ATEX is highly likely.
 - Category 2: high level of protection. Zone where ATEX is likely.
 - Category 3: normal level of protection. Zone where ATEX is unlikely.

Selecting the category on the basis of the zone:

ZONE	CATEGORY
0 or 20	1
1 or 21	1 or 2
2 or 22	1, 2 or 3

Selecting the zone on the basis of the category:

CATEGORY	ZONE
1	All
2	1, 21, 2 or 22
3	2 or 22

Explosion Group and Temperature Class

Explosion Group	Temperature Class					
	T1	T2	T3	T4	T5	T6
II A	Acetone Ethane Ethyl acetate Ethyl chloride Ammoniac Benzene Acetic acid	Carbon monoxide Methane Methanol Methyl chloride Propane Town gas Toluene	Amyl-i acetate Butane N-butyl alcohol Cyclohexane Dichloroethane 1, 2 Acetic anhydride	Petrol Otto fuels Aviation fuel Fuel oils Hexane	Acetaldehyde	
II B		Ethyl alcohol Ethylene Ethylene monoxide	Hydrogen sulphide	Ethyl ether		
II C	Hydrogen	Acetylene				Carbon disulphide

Temperature Class and Ignition Temperature:

Temperature Class	Ignition Temperature
T1	>450°C
T2	>300°C
T3	>200°C
T4	>135°C
T5	>100°C
T6	>85°C

Flammable Solids - Explosion-related Values

Product	Kmax	Pmax	MIE	LOC	MITn	MITc
Corn flour	127	6.7	300	--	530	460
Rice flour	40	6.7	>10	--	370	480
Wheat flour	47	8.2	>300	11%	460	470
Malt flour	100	7.8	>10	11%	310	460
Corn starch	143	10.6	>100	9%	440	400

HEAVY DUTY FANS FOR INDUSTRIAL APPLICATIONS

Since its founding, Sodeca has specialised in the design and manufacture of fans and accessories for industrial applications.

The combination of our experience - acquired over decades of working with fans - and the technological contributions of our engineers from different departments has made it possible for Sodeca to become one of the largest manufacturers of industrial ventilation in the world.

Industrial applications demand the ability to adapt to the specifications of each project as well as manufacturing flexibility so as to satisfy the real needs of each client.

In order to meet this objective, Sodeca produces a range of Standard products and a range of specially manufactured products in order to build fans that adapt to the demands of our clients.

For many years we have been making ongoing investments in the development of internal processes and applications in order to manufacture and supply special industrial fans within a very short design and production period.

Teamwork in our engineering department, our work with universities and technological centres, as well as the close collaboration between the design departments of our external partners makes it possible to achieve innovative solutions in industrial ventilation in a short period of time.

Throughout our history, we have developed every kind of technology in fans for industrial applications, which are currently used all over the world. It is our objective to continue to invest in this sector so as to remain at the forefront of the world's most respected industrial fan manufacturers.

STANDARDS COMPLIANCE FOR RAILWAY AND ROLLING EQUIPMENT

Related standards:

GOST 30630.0.0-99	Environment stability test methods for machines, instruments and other industrial products.
GOST 28231-89	(IEC 68-2-47-82) Basic methods of testing for exposure to external factors. Part 2: Testing. Fastening of elements, tools and other products in the course of dynamic testing. Including shock (Ea), multiple shock (Eb), vibration (Fc and Fd), linear acceleration (Ga) and Guidance.
GOST 30630.1.1-99	Methods of testing for resistance of machinery, instruments and other technical products to externally acting mechanical factors. Determining dynamic characteristics of a structure.
GOST 30630.1.2-99	Methods of testing for resistance of machinery, instruments and other technical products to externally acting mechanical factors. Vibration testing. . Testing for stability under exposure to sinusoidal or accidental wide-band vibration. . Long-run testing for durability under exposure to sinusoidal or accidental wide-band vibration (long-run chatter testing). . Testing for durability under exposure to multiple mechanical shocks (shock strength testing).
GOST 30631-99	General requirements to machinery, instruments and other technical products with regard to resistance to externally acting mechanical factors during operation.
GOST 17516.1	1990-MAY-23 Electrotechnical articles general requirements for stability to effect of environmental mechanical factors – Incorporates Amendment 1: 11/21/1997
UNE-EN 61373	Aplicaciones Ferroviarias, Material rodante, Ensayos de choque y vibración. Railway applications. Rolling equipment. Shock and vibration tests

Vibrations

The table shown below shows the vibration requirements for mounted equipment in A-Class vehicle. Sodeca fans comply with GOST vibration requirements, which are the most restrictive.

EN Standard

Standard number	Vibration type	Vibration RMS X Axis [m/s ²]	Vibration RMS Y Axis [m/s ²]	Vibration RMS Z Axis [m/s ²]	Vibration frequency [Hz]
EN 61373-2011	Increased random vibrations	2,83	2,09	4,25	-
	Standard random vibrations	0,50	0,37	0,75	-

GOST Standard

Standard number	Vibration type	Vibration amplitude X Axis [m/s ²]	Vibration amplitude Y Axis [m/s ²]	Vibration amplitude Z Axis [m/s ²]	Vibration frequency [Hz]
GOST 17516.1-1990 + GOST 16692.2 & GOST 30631-1999 + GOST 30630.0.0	Long term sinusoidal vibrations	15	15	15	10-100
	Short term sinusoidal vibrations	10	10	10	10-100

The next two figures shows displacement and stress maps for a Sodeca fan subjected to the vibration required by the GOST standard, in the Y axis. The test method consists of 687 repetitions 7 minutes long. The vibration is simulated by a sinusoidal acceleration of 15 m/s² amplitude at a frequency of 100 Hz. At the end of the test the fan has to endure 28.8 million cycles.

Fan's displacement map after the test. The displacement that is shown in the image has been increased to make it visible. The maximum displacement is 1.06 mm.

Fan's stress map after the test. The maximum stress is 69.7 MPa for steel parts and 65 MPa for aluminium parts. It is the maximum for all axes.

The cast aluminium's fatigue limit for 28.8 million cycles is about 80 MPa. All aluminium parts have a stress level below 65 MPa, so all these parts meet the requirements. The steel's fatigue limit is much higher than aluminium, so all steel parts also meet the requirements.

The ASCAMM technology centre studies Sodeca fans to ensure compliance with GOST and EN standards for products mounted in railway and rolling equipment. ASCAMM uses numerical simulations to check the fan design under the vibration and shock conditions required by the standards.

Impact

The table shown below shows the impact requirements for equipment mounted in A-Class vehicles. Sodeca fans comply with EN-61737 impact requirements, which are the most restrictive.

Impact requirements	EN 61373-2011
Acceleration X Axis [m/s ²]	50
Acceleration Y Axis [m/s ²]	30
Acceleration Z Axis [m/s ²]	30
Duration [m/s]	30

GOST 17516.1-1990 + GOST 16692.2 & GOST 30631-1999 + GOST 30630.0.0
30 m/s² (only one axis) Duration: 2-20 ms

The next two figures show displacement and stress maps for a Sodeca fan under the impact requirement of the EN-61373-2011 standard. The fan receives an impact with 30 m/s² acceleration and 30 ms duration in the Y axis.

Fan's displacement map after impact. The displacement that is shown in the image has been increased to make it visible. The maximum displacement is 0.12 mm.

Fan's stress map after the impact. The maximum stress is 23.5 MPa for all axes; it is located in the steel frame.

The test result confirms that the fan can resist the impact required by the standard, because 23.5 MPa is a stress value too low for steels.

TYPE APPROVAL CERTIFICATE FOR MARINE AND OFFSHORE APPLICATIONS

SODECA extractors for naval & off-shore uses are recognised by most shipbuilders and defence companies worldwide as being of high quality and operating well in these types of applications. Extractors made to order can comply with the different requirements of classification and certification societies.

The marine motors used are certified by most international marine classification bodies:

- ABS: American Bureau of Shipping
- BV: Bureau Veritas
- CCS: China Classification Societies
- CR: China Corporation Register of Shipping
- DNV: Det Norske Veritas
- GL: Germanischer Lloyd
- KR: Korean Register of Shipping
- LR: Lloyd's Register of Shipping
- NK: Nippon Kaiji Kyokai
- RINA: Registro Italiano Navale
- RS: Russian Maritime Register of Shipping

HEAVY DUTY FANS

FOR INDUSTRIAL, NAVAL & OFF-SHORE, CHEMICAL INDUSTRY APPLICATIONS, USE IN MINES, PUBLIC WORKS, POWER STATIONS AND AND FOR RAILWAY APPLICATIONS

CENTRIFUGAL FANS

CMRS

Robust centrifugal single-inlet, medium-pressure fans fitted with an impeller with backward-facing blades

14

CASB

Centrifugal single-inlet, high-pressure fans with casing and sheet steel impeller

20

CAB

Robust centrifugal single-inlet, high-pressure fans.

26

CMRS-X

Belt-driven fans with electric motor and impeller with backward curved blades.

31

CASB-X

Centrifugal belt-driven fans with electric motor

39

CMP/MAR

Centrifugal medium-pressure fans fitted with multi-blade impeller for marine application certification

48

CMPI

Centrifugal medium-pressure fans fitted with multi-blade impeller made from stainless steel AISI-304

52

CMRG

Centrifugal single-inlet medium-pressure hot-galvanised fans, to operate in chemical, aggressive or marine environments.

56

CPV

Centrifugal anti-corrosive single-inlet fans made from polypropylene

62

CMRH

Belt-driven fans, with electric motor for horizontal operation

67

AXIAL

HFV

Hot galvanised cased fans

72

HTP

Cased high-pressure axial fans

77

HBA

Axial fans Forked tubular with motor outside the air flow

93

ROOF

HTMH

Multifunctional roof fans for large flows

122

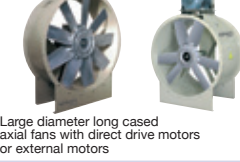

HPX/SEC

Fans for extreme conditions in ovens and driers

95

HGT HGTX

Large diameter long cased axial fans with direct drive motors or external motors

97

HCT/MAR HFT/MAR

Cased axial fans for marine and naval applications

119

FANS FOR: **ATEX EXPLOSIVE ATMOSPHERES**

HCDF

Axial fans with square frame, with ATEX Ex d certification

131

HDF

Axial fans with circular frame, with ATEX Ex d certification

131

HC/ATEX

Wall-mounted axial fans with ATEX certification and possible Ex e, EX d, Ex tc and Ex tb marked

134

HCH/ATEX

Robust wall-mounted axial fans with ATEX certification

140

HCT/ATEX

Robust long-cased axial fans with ATEX certification

140

HTM/ATEX

Mobile long cased fans with ATEX certification

147

HPX/ATEX

Long cased axial fans with external motor and ATEX certification

149

CPV/ATEX

Plastic anticorrosive centrifugal fans with ATEX certification

152

CMA/ATEX

Centrifugal medium-pressure fans made from cast aluminium with ATEX certification

155

CMP/ATEX

Centrifugal medium-pressure fans fitted with multi-blade impeller with ATEX certification

158

CMP/AL CJMP/AL

Aluminium fans certified for natural gas boiler rooms

166

CMR/ATEX

Robust centrifugal medium-pressure fans fitted with backward-curved impeller with ATEX certification

168

CAS/ATEX

Centrifugal single-inlet, high-pressure fans with ATEX certification

171

CA/ATEX

Centrifugal single-inlet, high-pressure fans made from cast aluminium with ATEX certification

176

HT/ATEX

Axial roof fans with ATEX certification and possible Ex e, Ex d, Ex tc and Ex tb marked

179

RFHD

Centrifugal roof fans with horizontal air outlet and ATEX Ex d certification

182

CVT/ATEX CHT/ATEX

Centrifugal roof fans with horizontal or vertical outlet with ATEX certification

186

KIT SOBREPRESIÓN

190

CMRS

Robust, centrifugal, single inlet, medium pressure fans with backward curved impeller

High-performance and robust backward-curved impeller.

Fan:

- Steel sheet casing
- Backward curved, robust steel impeller, designed to transport clean air or air with minimal amounts of small particles
- Direct drive motor

Motor:

- IE3 efficiency for 7.5kW and larger motors. Except for 1Ph, 2 speed and 8 pole motors.
- Class F insulation, IP55
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- Transported air temperature of between -20°C and 120°C

Finish:

- Anti-corrosive finish in polyester resin, polymerised at 190°C after phosphate free pre-treatment

On request:

- Special windings for different electrical supplies
- Fan designed to transport air up to 250°C
- Stainless steel construction
- ATEX certification, category 2
- IE2 and IE3 efficiency motors assembled on any unit

Order code

CMRS — 350 — 2T — 4

Robust, centrifugal, single inlet, medium pressure fans

Impeller size

Number of motor pole
 2=2900 r/min 50 Hz
 4=1400 r/min 50 Hz
 6=900 r/min 50 Hz

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm

Pe = Static pressure in mmH₂O, Pa and inwg

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm

Pe = Static pressure in mmH₂O, Pa and inwg

Fan Handings

Standard supply LG270, other handings on request.
Models 350 to 710 with adjustable handings. Special measurements in 180 and 225 handings.
Models 800 to 900 with adjustable handings. Special measurements except for position 315.
Models 1000 to 1400 are non-adjustable. Special measurements except for position 315.

Accessories

See accessories section.

CASB

Robust centrifugal single-inlet, high-pressure fans with sheet steel casing and impeller

Fan:

- Steel sheet casing
- Backward curved, robust steel impeller, designed to transport clean air or air with minimal amounts of small particles
- Direct drive motor

Motor:

- IE3 efficiency for 7.5kW and larger motors. Except for 1Ph, 2 speed and 8 pole motors.
- Class F insulation, IP55
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- Transported air temperature of between -20°C and 120°C

Finish:

- Anti-corrosive finish in polyester resin, polymerised at 190°C after phosphate free pre-treatment

On request:

- Special windings for different electrical supplies
- Fan designed to transport air up to 250°C
- Stainless steel construction
- ATEX certification, category 2
- IE2 and IE3 efficiency motors assembled on any unit

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm

Pe = Static pressure in mmH₂O, Pa and inwg

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm

Pe = Static pressure in mmH₂O, Pa and inwg

Fan Handings

Standard supply LG270, other handings on request.

Handings 180 and 225 on model sizes 350 to 630 have non-standard dimensions (details on request)

Models 710 to 1400 are non-adjustable. Special measurements except for position 315.

Accessories

See accessories section.

CAB

Robust centrifugal single-inlet, high-pressure fans with sheet steel casing and impeller

Fan:

- Steel sheet casing
- Backward curved, robust steel impeller, designed to transport clean air or air with minimal amounts of small particles
- Direct drive motor

Motor:

- IE3 efficiency for 7.5kW and larger motors. Except for 1Ph, 2 speed and 8 pole motors.
- Class F insulation, IP55
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- Transported air temperature of between -20°C and 120°C

Finish:

- Anti-corrosive finish in polyester resin, polymerised at 190°C after phosphate free pre-treatment

On request:

- Special windings for different electrical supplies
- Fan designed to transport air up to 250°C
- Stainless steel construction
- ATEX certification, category 2
- IE2 and IE3 efficiency motors assembled on any unit

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm

Pe = Static pressure in mmH₂O, Pa and inwg

Fan Handings

Standard supply LG270, other positions on request.

Models 501 to 802 with adjustable positions. Special measurements in 180 and 225 positions.

Models 901 to 902 with adjustable positions. Special measurements except for position 315.

CMRS-X

Belt-driven centrifugal fans with belt and pulley guard to ISO 13857

Robust build

Fan:

- Steel sheet casing
- Backward curved, robust steel impeller, designed to transport clean air or air with minimal amounts of small particles
- Dedicated motor support arrangement
- Belt-driven fan

Motor:

- Motors with IE3 efficiency
- Class F insulation, IP55
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- Transported air temperature of between -20°C and 150°C

On request:

- Special windings for different electrical supplies
- Fan designed to transport air up to 250°C
- Stainless steel construction
- ATEX certification, category 2
- Motors with IE2 efficiency

Finish:

- Anti-corrosive finish in polyester resin, polymerised at 190°C after phosphate free pre-treatment

Fan Handings

LG 270 standard supply

Accessories

See accessories section.

CASB-X

Belt-driven, high pressure centrifugal fans with belt and pulley guard to ISO 13857

Fan:

- Steel sheet casing
- Backward curved, robust steel impeller, designed to transport clean air or air with minimal amounts of small particles
- Dedicated motor support arrangement

Motor:

- Motors with IE3 efficiency
- Class F insulation, IP55
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- Transported air temperature of between -20°C and 150°C

Finish:

- Anti-corrosive finish in polyester resin, polymerised at 190°C after phosphate free pre-treatment

On request:

- Special windings for different electrical supplies
- Fan designed to transport air up to 250°C
- Stainless steel construction
- ATEX certification, category 2
- Motors with IE2 efficiency

Centrifugal medium-pressure fans fitted with multi-blade impeller for marine application

Centrifugal single-inlet, medium-pressure fans with casing and sheet steel impeller for operating in marine environments, fitted with motors suitable for marine service

Fan:

- Steel sheet casing
- Impeller with forward-facing blades made from galvanised sheet steel
- Intake ring in sheet steel

Motor:

- Motors for class F marine service, IP55 protection, complying with classification for non-essential naval service.
- IE3 efficiency for 7.5kW and larger motors. Except single-phase, 2 speed and 8 pole motors
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- Max. air temperature to transport: -20°C.+ 120°C.

On request:

- Hot galvanised steel finish
- Made from stainless steel
- Special windings for different electrical supplies and frequencies
- ATEX construction for different categories
- Built-in motors with PTC
- Marine motors for naval applications with certification for essential service by various classifying societies (BV, DNV, LR)
- Finish surface quality C4H, C5M
- IE2 and IE3 efficiency motors assembled on any unit

Finish:

- Anti-corrosive finish in polyester resin, polymerised at 190°C after phosphate free pre-treatment
- Finish surface quality C3H

The marine motors used may be certified by most international marine classification bodies:

ABS: American Bureau of Shipping	DNV: Det Norske Veritas	NK: Nippon Kaiji Kyokai
BV: Bureau Veritas	GL: Germanischer Lloyd	RINA: Registro Italiano Navale
CCS: China Classification Societies	KR: Korean Register of Shipping	RS: Russian Maritime Register of Shipping
CR: China Corporation Register of Shipping	LR: Lloyd's Register of Shipping

Acoustic features

The specified values are determined according to free field measurements of pressure and sound levels in dB(A) at an equivalent distance of twice the fan's span plus the turbine's diameter, with a minimum of 1.5 m.

Sound power Lw(A) spectrum in dB(A) via frequency band in Hz.

* Recommended nominal diameter for duct.

Characteristic curves

See page 162

Positions

LG 270 standard supply

LG 180 and RD 180 positions on request and with special fixing measures.

Accessories

See accessories section.

CMPI

Centrifugal medium-pressure fans fitted with multi-blade impeller made from stainless steel AISI-304

Centrifugal single-inlet, medium-pressure fans with casing and impeller in stainless steel sheeting for operating in chemical, aggressive or marine environments

Fan:

- Casing and impeller with forward-facing blades made from stainless steel AISI-304

Motor:

- Class F insulation, IP55, except single-phase models which have IP-54 protection.
- IE3 efficiency for 7.5kW and larger motors. Except single-phase, 2 speed and 8 pole motors
- Single-phase 230V-50Hz and three-phase 230/400V-50Hz (up to 4 kW) and 400/690V-50Hz (power over 4 kW)
- Max. air temperature to transport: -20°C.+ 120°C.

On request:

- Special windings for different electrical supplies and frequencies
- ATEX construction for different categories
- Manufactured with motor suitable for marine service
- Marine motors for naval applications with certification for essential service by various classifying societies (BV, DNV, LR)
- CE, NEMA, UL, CSA motors
- IE2 and IE3 efficiency motors assembled on any unit
- Made from stainless steel sheet casing AISI-316

Finish:

- Anticorrosive stainless steel.

Acoustic features

The specified values are determined according to free field measurements of pressure and sound levels in dB(A) at an equivalent distance of twice the fan's span plus the turbine's diameter, with a minimum of 1.5 m.

Sound power Lw(A) spectrum in dB(A) via frequency band in Hz.

Accessories

See accessories section.

CMRG

Centrifugal single-inlet, medium-pressure fans with hot-galvanised backward-facing blades to operate in chemical, aggressive or marine environments.

Fan:

- Robust hot galvanised sheet steel casing
- Impeller with backward-curved blades made from robust hot galvanised sheet steel
- Hot galvanised inlet ring

Motor:

- Class F insulation, IP55, except single-phase models which have IP-54 protection.
- IE3 efficiency for 7.5kW and larger motors. Except single-phase, 2 speed and 8 pole motors
- Single-phase 230V-50Hz and three-phase 230/400V-50Hz (up to 4 kW) and 400/690V-50Hz (power over 4 kW)
- Max. air temperature to transport: -20°C.+ 120°C.

On request:

- Special windings for different electrical supplies and frequencies
- ATEX construction for different categories
- Marine motors for naval applications with certification for essential service by various classifying societies (BV, DNV, LR)
- Made from stainless steel
- Marine motors for naval applications with certification for essential service by various classifying societies (BV, DNV, LR)
- CE, NEMA, UL, CSA motors
- IE2 and IE3 efficiency motors assembled on any unit

Finish:

- Hot galvanised steel anticorrosive

Acoustic features

The specified values are determined according to free field measurements of pressure and sound levels in dB(A) at an equivalent distance of twice the fan's span plus the turbine's diameter, with a minimum of 1.5 m.

Sound power Lw(A) spectrum in dB(A) via frequency band in Hz.

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm.

Pe = Static pressure in mmH₂O, Pa and inwg.

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm.

Pe = Static pressure in mmH₂O, Pa and inwg.

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm.

Pe= Static pressure in mmH₂O, Pa and inwg.

Positions

LG 270 standard supply
 Models 2380, 2590 and 28100 fixed positions LG 270 (other positions on request only)

Accessories

See accessories section.

CPV

Centrifugal anti-corrosive single-inlet fans made from polypropylene

Aesthetic and modern design

Fan:

- Polypropylene casing
- Impeller with forward-facing blades made from polypropylene

Motor:

- IE2 efficiency motors for capacities equal to or over 0.75kW and below 7.5kW, except single-phase, 2 speed and 8 pole motors.
- IE3 efficiency for 7.5kW and larger motors. Except single-phase, 2 speed and 8 pole motors
- Clas F insulation, IP55
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- Max. air temperature to transport: -20°C.+ 70°C.

Finish:

- Plastic anticorrosive

On request:

- Special windings for different electrical supplies
- ATEX certification, Category 3
- IE2 and IE3 efficiency motors assembled on any unit

Acoustic features

The specified values are determined according to free field measurements of pressure and sound levels in dB(A) at an equivalent distance of twice the fan's span plus the turbine's diameter, with a minimum of 1.5 m.

Sound power Lw(A) spectrum in dB(A) via frequency band in Hz.

CMRH

Belt-driven centrifugal fans with belt and pulley guard to ISO 13857 and 150mm of insulation

External lubricators to facilitate maintenance

Fan:

- Manufactured from heavy gauge steel
- Backward curved, robust steel impeller
- Cast metal bearing housings
- For horizontal operation
- External grease points

Motor:

- IE2 efficiency motors for capacities equal to or over 0.75kW and below 7.5kW, except single-phase, 2 speed and 8 pole motors
- IE3 efficiency for 7.5kW and larger motors. Except single-phase, 2 speed and 8 pole motors
- Class F insulation, IP55
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW

- Max. air temperature to transport: -20°C + 300°C

Finish:

- Heat resistant paint

On request:

- Special windings for different electrical supplies
- Fan designed to transport air up to 400°C
- Vertical mounting operation
- IE2 and IE3 efficiency motors assembled on any unit

Hot galvanised cased fans

Cased axial fans designed with four support arms to reduce vibration, and fitted with low energy consumption aerodynamic blade.

Fan:

- Airflow direction from motor to blade.
- AL version blades in cast aluminium
- Support ring in sheet steel with double clamp and cable duct for motor power supply.
- Hot galvanised sheet steel long casing.

- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- Fan working temperature: -25°C+ 50°C.

Finish:

- Hot galvanised steel

Motor:

- IE2 efficiency motors for capacities equal to or over 0.75kW and below 7.5kW, except single-phase, 2 speed and 8 pole motors
- IE3 efficiency for 7.5kW and larger motors. Except single-phase, 2 speed and 8 pole motors
- Class F insulation, IP55

On request:

- Airflow direction from impeller to motor.
- PL version impellers in polyamide with fibreglass.
- 100% reversible impellers.
- Special windings for different electrical supplies
- ATEX certification, category 2
- IE2 and IE3 efficiency motors assembled on any unit

Acoustic features

The specified values are determined according to free field measurements of pressure and sound levels in dB(A) at an equivalent distance of twice the fan's external diameter plus the impeller's diameter, with a minimum of 1.5 m.

Sound power Lw(A) spectrum in dB(A) via frequency band in Hz.

Accessories

See accessories section.

HTP

High pressure blade

Cased high-pressure axial fans

Robust cased high-pressure axial fans, especially designed for mining installations with large load losses

Fan:

- Sheet steel thick long casing
- Motor base welded to the casing
- Guidelines for high aerodynamic performance for pressure gain
- Optimum surface protection by means of high-quality steel.
- High-performance, cast aluminium impeller.
- Airflow direction from impeller to motor
- Electrical connection in outside terminal board.

Motor:

- IE2 efficiency motors for capacities equal to or over 0.75kW and below 7.5kW, except single-phase, 2 speed and 8 pole motors.
- IE3 efficiency for 7.5kW and larger motors. Except single-phase, 2 speed and 8 pole motors
- Class F insulation, IP55
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- Working temperature: -20°C +70°C

Finish:

- High-protection, anti-corrosion steel, specially primed and high-quality paint for corrosive environments.

On request:

- Standardised IP-55 motors, ATEX motors and two speeds
- Made entirely of stainless steel.
- Hot-rolled galvanised steel construction
- ATEX certification, category 2
- IE2 and IE3 efficiency motors assembled on any unit

Acoustic features

The specified values are determined according to free field measurements of pressure and sound levels in dB(A) at an equivalent distance of twice the fan’s external diameter plus the impeller’s diameter, with a minimum of 1.5 m.

Sound power Lw(A) spectrum in dB(A) via frequency band in Hz.

EXAMPLE OF SELECTION

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm.

Pe = Static pressure in mmH₂O, Pa and inwg.

HTP-63-4T

Initial data

- Working point:
- Airflow: 12,500 m³/h
- Load loss: 7.5 mmH₂O

Steps for selecting equipment

On the pressure graph:

- 1 Mark the working point, defined by the airflow (12,500 m³/h) and the load loss (7.5 mmH₂O).
- 2 Select the curve of the equipment which is closest above the working point. In our case, a curve with a blade angle of 22° is obtained.

On the power graph:

- 3 Mark the working point, defined by the airflow (12,500 m³/h) and the selected blade angle (22°).
- 4 Read the absorbed power on the power axis on the left. Pa = 560 W at the working point.
- 5 Look for the straight red line which is closest to the working point above. On the right-hand side of the graph, the value of the installed motor power is obtained. In our case, this is 0.75 kW or 1 HP

EXAMPLE OF ORDER CODE

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm

Pe = Static pressure in mmH₂O, Pa and inwg

Available features best efficiency point (BEP) at the end of the series.

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm

Pe = Static pressure in mmH₂O, Pa and inwg

Available features best efficiency point (BEP) at the end of the series.

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm

Pe = Static pressure in mmH₂O, Pa and inwg

Available features best efficiency point (BEP) at the end of the series.

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm

Pe = Static pressure in mmH₂O, Pa and inwg

Absorbed power

Available features best efficiency point (BEP) at the end of the series.

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm

Pe = Static pressure in mmH₂O, Pa and inwg

Available features best efficiency point (BEP) at the end of the series.

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm

Pe = Static pressure in mmH₂O, Pa and inwg

Absorbed power

Recommended motor power kW (HP)

Available features best efficiency point (BEP) at the end of the series.

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm

Pe = Static pressure in mmH₂O, Pa and inwg

Absorbed power

Recommended motor power kW (HP)

Available features best efficiency point (BEP) at the end of the series.

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm

Pe = Static pressure in mmH₂O, Pa and inwg

Absorbed power

Available features best efficiency point (BEP) at the end of the series.

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm

Pe = Static pressure in mmH₂O, Pa and inwg

Absorbed power

Recommended motor power kW (HP)

Available features best efficiency point (BEP) at the end of the series.

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm

Pe = Static pressure in mmH₂O, Pa and inwg

Absorbed power

Recommended motor power
kW (HP)

Available features best efficiency point (BEP) at the end of the series.

HBA

Forked cased axial fans with motor outside the air flow

Forked cased fans for moving air of up to 150°C continuously and up to 200°C sporadically.

- Fan:
- Sheet steel casing
 - Impeller made from cast aluminium
 - Airflow direction from impeller to motor

- Motor:
- IE2 efficiency motors for capacities equal to or over 0.75kW and below 7.5kW, except single-phase, 2 speed and 8 pole motors.
 - Class F insulation, IP55
 - Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
 - Working temperature: -25°C. + 150°C

- Finish:
- Anticorrosive with heat-protection paint for working in hot environments.

- On request:
- Casing made from stainless steel
 - Hot galvanised finish
 - Special windings for different electrical supplies and motors with PTC

Characteristic curves

Q = Airflow in m³/h, m³/s and cfm.

Pe = Static pressure in mmH₂O, Pa and inwg.

HPX/SEC

Fans designed with the most advanced technology and experience to withstand extreme working conditions in ovens, driers and other applications with high temperature and humidity

Fan:

- Thick sheet steel long casing with twist-lock cap.
- Impellers made from cast aluminium
- High-quality bearings with grease for high temperatures
- Bearing support with grease cups
- External grease cups in fan casing
- Airflow direction from motor to impeller

Motor:

- IE2 efficiency motors for capacities equal to or over 0.75kW and below 7.5kW, except single-phase, 2 speed and 8 pole motors.
- IE3 efficiency for 7.5kW and larger motors. Except single-phase, 2 speed and 8 pole motors
- Class F insulation, IP55
- Single-phase 230V-50Hz and three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- Working temperature: -25°C +150°C

Finish:

- Anticorrosive in heat-resistant paint

On request:

- Airflow direction from impeller to motor
- 100% reversible impellers.
- Special windings for different electrical supplies
- ATEX certification, category 2 (see HPX/ATEX series)
- IE2 and IE3 efficiency motors assembled on any unit

Acoustic features

The specified values are determined according to free field measurements of pressure and sound levels in dB(A) at an equivalent distance of twice the fan's external diameter plus the impeller's diameter, with a minimum of 1.5 m.

Sound power Lw(A) spectrum in dB(A) via frequency band in Hz.

HGT: Large diameter long cased axial fans with direct drive motor

HGTX: Large diameter long cased axial fans with external motor

Long cased axial fans, supplied with 3, 6 or 9 blade aluminium impellers with different slope angles.

HGT

HGTX

Fan:

- Airflow direction from motor to impeller
- Impellers made from cast aluminium supplied with 3, 6 or 9 blades with adjustable slope angles.
- Sheet steel casing
- HGT: The standard version is short casing. The long-casing version is equipped with an inspection hatch.
- HGTX: Standard version in long-casing, equipped with an inspection hatch.

Motor:

- IE3 efficiency for 7.5kW and larger motors. Except single-phase, 2 speed and 8 pole motors
- IE2 efficiency motors for capacities equal to or over 0.75kW and below 7.5kW, except single-phase, 2 speed and 8 pole motors.
- Class F insulation, IP55
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- Working temperature:
HGT: -25°C +50°C
HGTX: -25°C +120°C

Finish:

- Anti-corrosive finish in polyester resin, polymerised at 190°C after phosphate free pre-treatment

On request:

- Airflow direction from impeller to motor.
- 100% reversible impellers.
- Special windings for different electrical supplies
- ATEX certification, category 2
- HGT: Long-casing fans with inspection hatch
- Two-speed motors
- IE2 and IE3 efficiency motors assembled on any unit

Order code

HGT: Large diameter long cased axial fans with direct drive motor
HGTX: Large diameter long cased axial fans with external motor

Impeller diameter in cm.

Number of motor pole
4=1400 r/min. 50 Hz
6=900 r/min. 50 Hz
8=750 r/min. 50 Hz

T=Three-phase

Number of blades:
3 blades
6 blades
9 blades

Motor power (HP)

Angle of inclination of the blades

PV=Distributor

Acoustic features

The specified values are determined according to free field measurements of pressure and sound levels in dB(A) at an equivalent distance of twice the fan's external diameter plus the impeller's diameter, with a minimum of 1.5 m.

Sound power Lw(A) spectrum in dB(A) via frequency band in Hz.

EXAMPLE OF SELECTION

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm.

Pe= Static pressure in mm H₂O, Pa and inwg.

Impeller diameter (cm): 125 Number of pole: 8 Number of blades: 3

Initial data

- Working point:
- Airflow: 12,500 m³/h
- Load loss: 7.5 mmH₂O

Steps for selecting equipment

On the pressure graph:

- 1 Mark the working point, defined by the airflow (12,500 m³/h) and the load loss (7.5 mmH₂O).
- 2 Select the curve of the equipment which is closest above the working point. In our case, a curve with a blade angle of 22° is obtained.

On the power graph:

- 3 Mark the working point, defined by the airflow (12,500 m³/h) and the selected blade angle (22°).
- 4 Read the absorbed power on the power axis on the left. Pa= 560 W at the working point.
- 5 Look for the straight red line which is closest to the working point above. On the right-hand side of the graph, the value of the installed motor power is obtained. In our case, this is 0.75 kW or 1 HP

EXAMPLE OF ORDER CODE

HGT — 125 — 8T — 3 — 1 — 22

HGT: Large diameter long cased axial fans with direct drive motor
 HGTX: Large diameter long cased axial fans with external motor

Impeller diameter in cm.

Number of motor pole
 4=1400 r/min. 50 Hz
 6=900 r/min. 50 Hz
 8=750 r/min. 50 Hz

T=Three-phase

Number of blades:
 3 blades
 6 blades
 9 blades

Motor power (HP)

Angle of inclination of the blades

Characteristic Curves

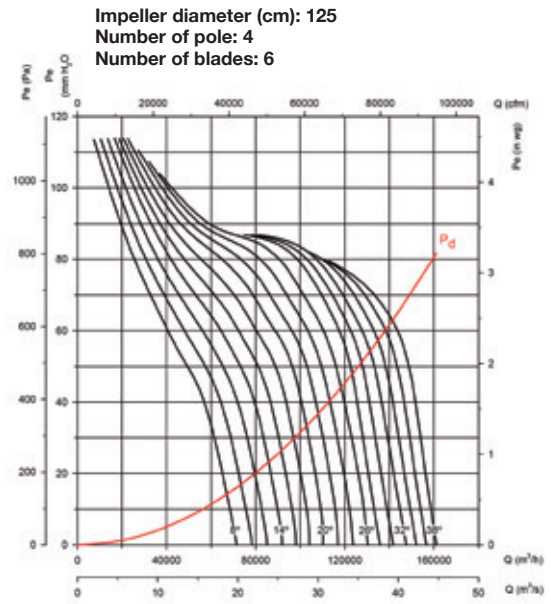

Q = Airflow in m³/h, m³/s and cfm

Pe = Static pressure in mmH₂O, Pa and inwg

Absorbed power

Recommended motor power
kW (HP)

HCT/MAR HFT/MAR

HCT/MAR: Robust cased axial fans for fitting between ducts, for marine and naval applications

HFT/MAR: Cased axial fans for start of duct, very tough for marine and naval applications

HCT/MAR

HFT/MAR

Circular axial fans with two flanges (HFT) or long cased axial fans for fitting between ducts (HCT), for operating in marine environments, fitted with motors suitable for marine service

Fan:

- HFT/MAR: Support ring with two flanges made from highly robust hot galvanised sheet steel
- HCT/MAR: Tubular hot-galvanised casing in sheet steel of great strength, to fit between ducts
- Impeller made from cast aluminium
- Incorporates with inspection hatch (HCT)
- Airflow direction from motor to impeller

Motor:

- Motors for class F marine service, with ball bearings, IP55 protection, complying with classification for non-essential naval service.
- IE3 efficiency for 7.5kW and larger motors. Except single-phase, 2 speed and 8 pole motors

- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- Max. air temperature to transport: -20°C+ 60°C

Finish:

- Hot galvanised anticorrosive

On request:

- Made from stainless steel
- Special windings for different electrical supplies and frequencies
- ATEX construction for different categories
- Built-in motors with PTC
- Marine motors for naval applications with certification for essential service by various classifying societies (BV, DNV, LR)
- IE2 and IE3 efficiency motors assembled on any unit

The marine motors used may be certified by most international marine classification bodies:

ABS: American Bureau of Shipping	DNV: Det Norske Veritas	NK: Nippon Kaiji Kyokai
BV: Bureau Veritas	GL: Germanischer Lloyd	RINA: Registro Italiano Navale
CCS: China Classification Societies	KR: Korean Register of Shipping	RS: Russian Maritime Register of Shipping
CR: China Corporation Register of Shipping	LR: Lloyd's Register of Shipping

Acoustic features

The specified values are determined according to free field measurements of pressure and sound levels in dB(A) at an equivalent distance of twice the fan’s span plus the impeller’s diameter, with a minimum of 1.5 m.

Sound power Lw(A) spectrum in dB(A) via frequency band in Hz.

Multifunctional roof fans for large flows

Multifunctional roof fans, highly robust construction, for large flows

Fan:

- Painted galvanised sheet steel base plate
- Turnable impellers cast aluminium.
- Protection guard to prevent contacts according to standard UNE-EN ISO 12499:2010
- Painted galvanised sheet steel hood with natural air outlet.

Motor:

- IE2 efficiency motors for capacities equal to or over 0.75kW and below 7.5kW, except single-phase, 2 speed and 8 pole motors.
- IE3 efficiency for 7.5kW and larger motors. Except single-phase, 2 speed and 8 pole motors
- Class F insulation, IP55,
- Single-phase 230V-50Hz and three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW)
- Fan working temperature: -25°C + 50°C

On request:

- ATEX and two-speed motors
- Made entirely from stainless steel.
- Hot-rolled galvanised steel construction
- Marine motors for naval applications with certification for essential service by various classifying societies (BV, DNV, LR)
- CE, NEMA, UL, CSA motors
- Finish surface quality C5M
- IE2 and IE3 efficiency motors assembled on any unit

Finish:

- Anti-corrosive finish in polyester resin, polymerised at 190°C after phosphate free pre-treatment
- Finish surface quality C4H

Order code

(1) The sound level values are free field measurements of pressure in dB(A) at a distance of 6 m.

Acoustic features

Values taken at inlet with maximum airflow.

Values taken at outlet with maximum airflow.

Sound power Lw(A) spectrum in dB(A) via frequency band in Hz.

HCDF HDF

HCDF: Axial fans with square frame, with ATEX Ex d certification

HDF: Axial fans with circular frame, with ATEX Ex d certification

Marked: $\text{CE} \text{Ex} \text{II} \text{2G} \text{Ex} \text{d}$
Notified authority: L.O.M
Identification No: LOM3ATEX0157

HCDF

HDF

Wall-mounted axial fans (HCDF) or circular fans (HDF) with ATEX certification and CEE ExII2G Ex d flame-resistant motor to work in explosive atmospheres.

Fan:

- Impeller made from cast aluminium
- Airflow direction from motor to impeller
- Flame-resistant stuffing-box included
- HCDF: Support frame in sheet steel with aluminium strip in the impeller area in accordance with Standard EN-14986:2007
- HCDF: Protection guard to prevent contacts according to standard UNE-EN ISO 12499:2010
- HDF: Support ring in sheet steel with aluminium strip in the impeller area in accordance with Standard EN-14986:2007

Motor:

- Class F insulation, IP55 with ATEX certification, Ex"d" IIBT4 flame-resistant
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- HDF: Fan working temperature: -20°C + 40°C
- HCDF: Fan working temperature: -20°C +50 °C

Finish:

- Rust retardant finish with ATEX paint, containing no ferrous components, in polyester resin polymerised at 190°C, after phosphate free pre-treatment

On request:

- Special windings for different electrical supplies and frequencies
- ATEX construction for different categories
- Fans with two-speed motor.

Aluminium strip to prevent sparks as per the EN-14986:2007 standard

Order code

HCDF: Axial fans with square frame, with ATEX certification
HDF: Axial fans with circular frame, with ATEX certification

Impeller diameter (cm)

Number of motor pole
4=1400 r/min. 50 Hz
6=900 r/min. 50 Hz

T=Three-phase
M=Single-phase

Acoustic features

The specified values are determined according to free field measurements of pressure and sound levels in dB(A) at an equivalent distance of twice the fan's span plus the impeller's diameter, with a minimum of 1.5 m.

Sound power Lw(A) spectrum in dB(A) via frequency band in Hz.

HC/ATEX *Wall-mounted axial fans with ATEX certification and possible Ex e, Ex d, Ex tc and Ex tb markings*

HC-25...63

HC-71...100

Wall-mounted axial fans with ATEX certification, with CEE ExII2G Ex e explosion-proof and CEE ExII2G Ex d, Ex tc, or Ex tb flame-resistant motor to work in explosive atmospheres of gas or dust.

Fan:

- Impeller made from cast aluminium
- Airflow direction from motor to impeller
- Stuffing-box spark-proof included
- Protection guard against contacts, in accordance with standard UNE-EN ISO 12499:2010 included in models 25 to 63, other models as accessory.
- Support frame in sheet steel with aluminium strip in the impeller area in accordance with Standard EN-14986:2007

Motor:

- Class F motors with ball bearings and ATEX certification, Ex e explosion-proof and Ex d, Ex tc, or Ex tb flame-resistant
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- Fan working temperature: -20°C + 40°C

Ex "e" marked: CEE Ex II 2G Ex e
Ex "d" marked: CEE Ex II 2G Ex d
Ex tc marked: CEE Ex II 3D Ex tc
Ex tb marked: CEE Ex II 2D Ex tb
Notified authority: L.O.M
Identification No: LOM3ATEX0157

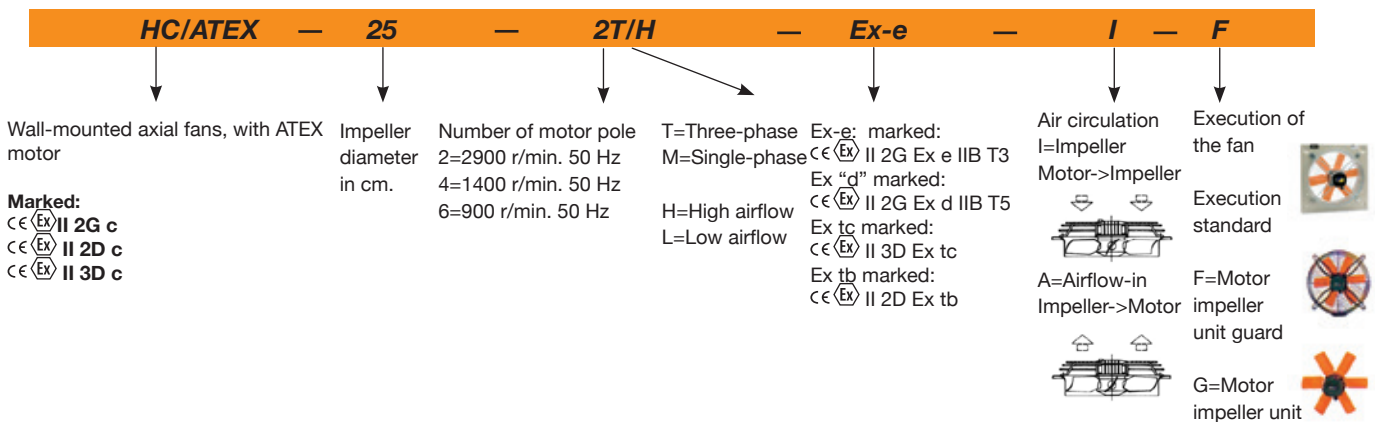

Finish:

- Rust retardant finish with ATEX paint, containing no ferrous components, in polyester resin polymerised at 190°C, after phosphate free pre-treatment

On request:

- Built-in motors with PTC
- Special windings for different electrical supplies and frequencies
- ATEX construction for different categories
- Fans with two-speed motor.
- Ex d flame-resistant single-phase motors

Acoustic features

The specified values are determined according to free field measurements of pressure and sound levels in dB(A) at an equivalent distance of twice the fan's span plus the impeller's diameter, with a minimum of 1.5 m.

Sound power Lw(A) spectrum in dB(A) via frequency band in Hz.

HCH/ATEX

HCT/ATEX

Circular axial fans (HCH) or Long-cased fans (HCT) with ATEX certification, CEE ExII2G Ex e, explosion-proof and CEE ExII2G Ex d, Ex tc, or Ex tb flame-resistant motor to work in explosive atmospheres.

Fan:

- HCH/ATEX: Support ring in sheet steel with aluminium strip in the impeller area in accordance with Standard EN-14986:2007
- HCT/ATEX: Sheet steel long casing with aluminium strip in the impeller area in accordance with Standard EN-14986:2007
- Impeller made from cast aluminium
- Incorporates with inspection hatch (HCT)
- Airflow direction from motor to impeller

Motor:

- Class F motors with ball bearings and ATEX certification, Ex e explosion-proof and Ex d, Ex tc, or Ex tb flame-resistant
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- Fan working temperature: -20°C + 40°C

Finish:

- Rust retardant finish with ATEX paint, containing no ferrous components, in polyester resin polymerised at 190°C, after phosphate free pre-treatment

On request:

- Built-in motors with PTC
- Special windings for different electrical supplies and frequencies
- ATEX construction for different categories
- Fans with two-speed motor.
- Ex d flame-resistant single-phase motors

Acoustic features

The specified values are determined according to free field measurements of pressure and sound levels in dB(A) at an equivalent distance of twice the fan's span plus the impeller's diameter, with a minimum of 1.5 m.

Sound power Lw(A) spectrum in dB(A) via frequency band in Hz.

Accessories

See accessories section.

HTM/ATEX

Mobile long cased fans with ATEX certification

Mobile long-cased axial fans with ATEX certification, CEE ExII2G Ex e, explosion-proof and CEE ExII2G Ex d, Ex tc, or Ex tb flame-resistant to work in explosive atmospheres.

Fan:

- Sheet steel long casing with aluminium strip in the impeller area in accordance with Standard EN-14986:2007
- Impeller made from cast aluminium
- Incorporates with inspection hatch
- Protection guard to prevent contacts according to standard UNE-EN ISO 12499:2010 on both sides
- Airflow direction from motor to impeller

Motor:

- Class F motors with ball bearings and ATEX certification, Ex e explosion-proof and Ex d, Ex tc, or Ex tb flame-resistant
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- Fan working temperature: -20°C + 40°C

Acoustic features

The specified values are determined according to free field measurements of pressure and sound levels in dB(A) at an equivalent distance of twice the fan's span plus the impeller's diameter, with a minimum of 1.5 m.

Sound power Lw(A) spectrum in dB(A) via frequency band in Hz.

HPX/ATEX *Cased axial fans with external motor and ATEX certification*

Cased belt-driven axial fans with casing opening up to 180° to work in explosive atmospheres.

Fan:

- Sheet steel long casing with aluminium strip in the impeller area in accordance with Standard EN-14986:2007
- Impellers made from cast aluminium
- Pulley and belt protector with copper coating to prevent sparks
- Sealed transmission unit (IP66) with double retention system
- Airflow direction from motor to impeller
- Maximum temperature of air to be transported: -20°C +120°C

Motor:

- Class F insulation, IP55, with ATEX certification, Ex"e" explosion-proof and Ex"d", Ex tc, or Ex tb flame-resistant
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW

Aluminium strip to prevent sparks as per the EN-14986:2007 standard

CPV/ATEX *Plastic anticorrosive centrifugal fans with ATEX certification*

Centrifugal single-inlet fans made from ATEX anti-static plastic, to operate in explosive atmospheres, with CEE ExII3G Ex e explosion-proof motor or CEE ExII3G Ex d flame-resistant motor

Fan:

- ATEX anti-static plastic casing
- Impeller with forward-facing blades made from ATEX anti-static plastic

Motor:

- Class F insulation, IP55 with ATEX certification, Ex"e" explosion-proof or Ex"d" flame-resistant
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW)
- Max. air temperature to transport: -20°C+ 80°C

Finish:

- ATEX plastic anticorrosive

On request:

- Built-in motors with PTC
- Special windings for different electrical supplies and frequencies
- ATEX construction for different categories

CMP/ATEX *Centrifugal medium-pressure fans fitted with multi-blade impeller with ATEX certification*

ATEX version on request made from stainless steel

Centrifugal single-inlet, medium-pressure fans with casing and sheet steel impeller to work in explosive atmospheres.

Fan:

- Steel sheet casing
- Impeller with forward-facing blades made from galvanised sheet steel
- Spark-proof inlet ring in copper or aluminium
- Max. air temperature to transport: -20°C+ 80°C

Motor:

- Class F insulation, IP55 with ATEX certification, Ex"e" explosion-proof or Ex"d" flame-resistant
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW

Finish:

- Rust retardant finish with ATEX paint, containing no ferrous components, in polyester resin polymerised at 190°C, after phosphate free pre-treatment

On request:

- Built-in motors with PTC
- Special windings for different electrical supplies and frequencies
- ATEX construction for different categories
- Made from stainless steel

Positions

LG 270 standard supply
 LG 180 and RD 180 positions on request and with special fixing measures.

Accessories

See accessories section.

CMP/ATEX

Centrifugal medium-pressure fans fitted with multi-blade impeller with ATEX certification

Centrifugal single-inlet, medium-pressure fans with casing and sheet steel impeller to work in explosive atmospheres.

CMP/MAR

Centrifugal medium-pressure fans fitted with multi-blade impeller for marine applications

Centrifugal single-inlet, medium-pressure fans with casing and sheet steel impeller to work in marine environments and fitted with motor for service marine

CMPI

Centrifugal medium-pressure fans fitted with multi-blade impeller made from stainless steel AISI-304

Centrifugal single-inlet, medium-pressure fans with casing and turbine in stainless steel, to work in chemical, aggressive or marine environments

CMP/AL CJMP/AL

CMP/AL: Aluminium spark-proof fans certified according to norm UNE-60601-2013 and the requirements of natural gas boiler rooms

CJMP/AL: Aluminium spark-proof ventilation units certified according to norm UNE-60601-2013 and the requirements of natural gas boiler rooms

Dynamically balanced wheels with robust centres

- Fan:**
- Impeller with forward-facing blades made from aluminium sheet
 - CMP/AL: Casing made from aluminium sheet
 - CJMP/AL: Galvanised sheet steel structure

- Motor:**
- Class F insulation, IP55
 - Single-phase 230V.-50Hz.
 - Max. air temperature to transport: -20°C.+ 120°C.

- Finish:**
- CMP/AL: Anti-corrosive finish in polyester resin, polymerised at 190°C after phosphate free pre-treatment
 - CJMP/AL: Anticorrosive galvanised sheet steel

- On request:**
- Special windings for different electrical supplies
 - ATEX certification, category 2

CMR/ATEX *Robust centrifugal medium-pressure fans with backwards-curved impeller, with ATEX certification*

Robust centrifugal single-inlet, medium-pressure fans to work in explosive atmospheres.

Fan:

- Steel sheet casing
- Impeller with backward-curved blades made from robust sheet steel
- Spark-proof inlet ring in copper or aluminium

Motor:

- Class F insulation, IP55 with ATEX certification, Ex"e" explosion-proof or Ex"d" flame-resistant
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- Max. air temperature to transport: -20°C+ 80°C

Ex "e" marked: $\text{CE} \text{Ex} \text{II} 2\text{G} \text{Ex} \text{e}$

Acoustic features

The specified values are determined according to free field measurements of pressure and sound levels in dB(A) at an equivalent distance of twice the fan's span plus the turbine's diameter, with a minimum of 1.5 m.

Sound power Lw(A) spectrum in dB(A) via frequency band in Hz.

* Recommended nominal diameter for duct.

Characteristic Curves

Q = Airflow in m³/h, m³/s and cfm.

Pe = Static pressure in mmH₂O, Pa and inwg.

Positions

LG 270 standard supply

Accessories

See accessories section.

CAS/ATEX

Centrifugal single-inlet, high-pressure fans with ATEX certification

Centrifugal high-pressure fans with ATEX certification, CEE ExII2G Ex e, explosion-proof and CEE ExII2G Ex d, Ex tc, or Ex tb flame-resistant to work in explosive atmospheres.

Fan:

- Steel sheet casing
- Impeller with backward-facing blades made from galvanised sheet steel, except models 242-248-254-260-640-645-650 which have a cast aluminium impeller.
- Spark-proof inlet ring in copper or aluminium

Motor:

- Class F motors with ball bearings and ATEX certification, Ex e explosion-proof and Ex d, Ex tc, or Ex tb flame-resistant
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- Max. air temperature to transport: -20°C+ 80°C

Ex "e" marked: $\text{CE} \text{Ex} \text{II} 2\text{G} \text{Ex} \text{e}$
 Ex "d" marked: $\text{CE} \text{Ex} \text{II} 2\text{G} \text{Ex} \text{d}$
 Ex tc marked: $\text{CE} \text{Ex} \text{II} 3\text{D} \text{Ex} \text{tc}$
 Ex tb marked: $\text{CE} \text{Ex} \text{II} 2\text{D} \text{Ex} \text{tb}$
 Notified authority: L.O.M
 Identification No:
 LOM4ATEX007

Finish:

- Rust retardant finish with ATEX paint, containing no ferrous components, in polyester resin polymerised at 190°C, after phosphate free pre-treatment

On request:

- Built-in motors with PTC
- Special windings for different electrical supplies and frequencies
- ATEX construction for different categories
- Fans with two-speed motor.

Order code

Acoustic features

The specified values are determined according to free field measurements of pressure and sound levels in dB(A) at an equivalent distance of twice the fan's span plus the turbine's diameter, with a minimum of 1.5 m.

Sound power Lw(A) spectrum in dB(A) via frequency band in Hz.

CA/ATEX

Built in aluminium to prevent sparks

Centrifugal single-inlet, high-pressure fans made from cast aluminium with ATEX certification

Centrifugal high-pressure fans with casing and impeller made from cast aluminium with ATEX certification, CEE ExII2G Ex e explosion-proof and CEE ExII2G Ex d, Ex tc, or Ex tb flame-resistant motor to work in explosive atmospheres.

Fan:

- Casing made from cast aluminium
- Impeller made from cast aluminium

Motor:

- Class F motors with ball bearings and ATEX certification, Ex e explosion-proof and Ex d, Ex tc, or Ex tb flame-resistant
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- Max. air temperature to transport: -20°C+ 80°C

Ex "e" marked: $\text{CE} \text{Ex} \text{II} 2\text{G} \text{Ex} \text{e}$
 Ex "d" marked: $\text{CE} \text{Ex} \text{II} 2\text{G} \text{Ex} \text{d}$
 Ex tc marked: $\text{CE} \text{Ex} \text{II} 3\text{D} \text{Ex} \text{tc}$
 Ex tb marked: $\text{CE} \text{Ex} \text{II} 2\text{D} \text{Ex} \text{tb}$
 Notified authority: L.O.M
 Identification No:
 LOM4ATEX007

Finish:

- Rust retardant finish with ATEX paint, containing no ferrous components, in polyester resin polymerised at 190°C, after phosphate free pre-treatment

On request:

- Built-in motors with PTC
- Special windings for different electrical supplies and frequencies
- ATEX construction for different categories
- Fans with two-speed motor.

Acoustic features

The specified values are determined according to free field measurements of pressure and sound levels in dB(A) at an equivalent distance of twice the fan's span plus the turbine's diameter, with a minimum of 1.5 m.

Sound power Lw(A) spectrum in dB(A) via frequency band in Hz.

HT/ATEX

Axial roof fans with ATEX certification and possible Ex e, Ex d, Ex tc and Ex tb marked

Roof fans with flat base with ATEX certification, CEE ExII2G Ex e explosion-proof and CEE ExII2G Ex d, Ex tc, or Ex tb flame-resistant to work in explosive atmospheres of gas or dust.

Fan:

- Sheet steel base plate with aluminium strip in the impeller area in accordance with Standard EN-14986:2007
- Impeller made from cast aluminium
- Stuffing-box spark-proof included
- Protection guard to prevent contacts according to standard UNE-EN ISO 12499:2010
- Rain deflector hood made of sheet aluminium with anticorrosive protection, except models 80,90,100 which come in polyester
- Airflow direction from motor to impeller

Motor:

- Class F motors with ball bearings and ATEX certification, Ex e explosion-proof and Ex d, Ex tc, or Ex tb flame-resistant
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- Fan working temperature: -20°C + 40°C

Ex "e" marked: CEE II 2G Ex e
 Ex "d" marked: CEE II 2G Ex d
 Ex tc marked: CEE II 3D Ex tc
 Ex tb marked: CEE II 2D Ex tb
 Notified authority: L.O.M
 Identification No:
 LOM3ATEX0157

Finish:

- Rust retardant finish with ATEX paint, containing no ferrous components, in polyester resin polymerised at 190°C, after phosphate free pre-treatment

On request:

- Built-in motors with PTC
- Special windings for different electrical supplies and frequencies
- ATEX construction for different categories
- Fans with two-speed motor.
- Ex d flame-resistant single-phase motors

Acoustic features

The specified values are determined according to free field measurements of pressure and sound levels in dB(A) at a distance of 6 m.

Sound power Lw(A) spectrum in dB(A) via frequency band in Hz.

Values taken at the inlet with 2/3 of the maximum airflow (2/3Qmax).

Pe = Static pressure in mmH₂O, Pa and inwg.

Accessories

See accessories section.

RFHD

Centrifugal roof fans with horizontal outlet and ATEX Ex d certification

Centrifugal roof fans with horizontal air outlet and hood in aluminium. ATEX certification and CEE ExII2G Ex d flame-resistant to work in explosive atmospheres.

Ex "d" marked: $\text{CE} \text{Ex} \text{II} 2\text{G} \text{Ex} \text{d}$
 Notified authority: L.O.M
 Identification No:
 LOM03ATEX0147

Fan:

- Base support in galvanised steel with inlets made from brass according to standard EN-14986:2007
- Impeller with backward-curved blades made from galvanised sheet steel
- Bird guard
- Aluminium rain deflector hood

Motor:

- Class F motors with ball bearings and ATEX certification, Ex d II B T4 Gb flame-resistant
- Three phase, 50Hz, 230/400V motors up to and including 4kW. 400/690V over 4kW
- Max. air temperature to transport: -20 °C+ 80 °C

Finish:

- Anticorrosive galvanised sheet steel and aluminium

On request:

- Built-in motors with PTC.
- Special windings for different electrical supplies and frequencies
- ATEX construction for different categories
- Ex d flame-resistant single-phase motors

(1) The sound level values are measurements of pressure in dB(A) at a distance of 6 m and at 2/3 of the maximum airflow (2/3 Qmax.)

Acoustic features

The specified values are determined according to free field measurements of pressure and sound levels in dB(A) at a distance of 6 m.

Sound power Lw(A) spectrum in dB(A) via frequency band in Hz.

Values taken at the inlet with 2/3 of the maximum airflow (2/3Qmax).

Characteristic curves

Q = Airflow in m³/h, m³/s and cfm.

Pe = Static pressure in mmH₂O, Pa and inwg.

The Lp (dB(A)) sound levels given on the curves are free field pressure measurements at 6 metres at the inlet.

Characteristic curves

Q = Airflow in m³/h, m³/s and cfm.

Pe= Static pressure in mmH₂O, Pa and inwg.

The Lp (dB(A)) sound levels given on the curves are free field pressure measurements at 6 metres at the inlet.

Variation of sound pressure depending on distance

The sound level may vary depending on the roof structure.

Accessories

See accessories section.

KIT SOBREPRESIÓN

The system of pressurising staircases, escape routes or confined areas makes it possible to control the airflow automatically and to maintain a differential pressure of 50 Pa in a single stage, according to standard UNE EN 12101-6-2006.

STAIRWELL OVERPRESSURE KIT
Three-phase equipment

STAIRWELL OVERPRESSURE KIT

- Stairwell overpressure kit made up of control panel (BOXPRES KIT) and outlet units (CJHCH or CJBD), for the pressurisation of the stairwells and escape routes. Also available for single-phase equipment's NEOLINEO and CJBC.

OVERPRESSURE KIT WITH RESERVE FAN

- Overpressure kit with reserve fan, made up of control panel (BOXPRES KIT II), which incorporates a system of automatic switching to keep the overpressure in the case of a stop by the main fan and TWIN or CJHCH/DUPLEX air outlet units with reserve fan.

STAIRWELL OVERPRESSURE KIT
For single-phase equipment

BOXPRES

- Easy to install
- Compact and self-sufficient solution
- Preventive maintenance
- Easy starting
- Safe and functional installation

- The proper operation of the pressurisation systems depends not only on correct design but also on the proper regulation carried out by the system with the result that it is of vital importance to have calibrated and highly-precise regulation elements which make it possible to have the two situations in the case of fire, in a rapid and stable manner.
- The BOXPRES control panel, apart from satisfying the most demanding requirements, simplifies the work of the installer to the greatest possible extent.

Includes:

- Frequency inverter programmed to 50 Pa
- Differential pressure probe
- Magneto thermal
- Line LED and fault
- Check button

BOXPRES is a piece of equipment with all its interconnections made and tested

- Ready to work and carry out its duties on the pressure control of the installation.
- Possibility of checking the installation so as to prevent faults
- Only the power cable, the impulsion fan and the fire signal should be connected.

The panels for single-phase equipment include:

- Voltage regulator programmed to 50 Pa
- Differential pressure probe external to the equipment.

OVERPRESSURE KIT
WITH RESERVE FAN

Pressure connection

Example of use

Overpressure smoke control method; this system consists of pressurization by means of injecting air into spaces which are used as escape routes for people in case of fire, such as stair wells, passageways, corridors, elevators, etc. Above all in densely occupied tall buildings. This method is based on smoke control by means of the speed of air and the artificial barrier which is created by excess air pressure over smoke, so that it cannot enter escape routes.

ACCESSORIES

INT  On/Off safety switches compliant with the UNE-EN 60204-1 Standard. 195	Interruptor ATEX  ATEX on/off switch compliant with directives 94/9/EC and 2006/95/EC 195	AR  Smooth starters for three-phase motors. 195	VSD3/A-RFT VSD1/A-RFM  Electronic variable speed drives 196	KME  External control kit for On/Off and velocity control for VSD1/A-RFM and VSD3/A-RFT frequency converters 197

INT

Stop-start safety switches in accordance with Standard UNE-EN 60204-1.

Features:

- Switches to install beside the fan, so that the mains current can be cut off before handling the fan.
- IP65 protection
- For single-phase or three-phase fans, use a 3-pole switch (3CA)
- For three-phase two-speed fans, use a 6-pole switch (6CA).

Interruptor ATEX

Stop-start ATEX switch in accordance with directives 94/9/EC and 2006/95/EC

Features:

- I 3G Ex nR IIC T6 Gc
- II 2D Ex tb IIIC T XX °C Db IP66
- IP66 protection
- Manufactured from anti-static thermoplastic
- 3-pole switches for three-phase motors at a maximum line voltage of 400V.

AR

Soft starters for three-phase motors.

Features:

- Especially designed to reduce the current peak caused during start-up of fans with three-phase motors.
- Power Voltage 400V + - 10% 50/60Hz
- Mounted in box for DIN-35 rail
- Possibility of adjusting the starting torque, acceleration time and deceleration time.

Model	AR-2	AR-4	AR-7.5	AR-10	AR-15	AR-20	AR-30
Supplied voltage	400 V ±10% 50/60 Hz						
Motor power in kW at 400 V	1.5	3	5.5	7.5	11	15	22
Minimum motor power	40% of the motor's nominal power			20% of the motor's nominal power			
External fuses (quick-action) in (A)	16	25	35	25	35/40	50	63
Nominal current in (A)	3.5	6.5	12	17	25	32	45
Adjustment range of start-up torque	From 0 to 80%						
Adjustment range of start-up time	From 0.5 to 12 s			From 0.5 to 10 s			
Braking torque	Level set at 70%						
Adjustment range of deceleration time	From 0.5 to 12 s			From 0.5 to 10 s			
Setup time	200 ms						
Working temperature	0°C...45°C						
Storage temperature	-25°C...75°C						
Protection level	IP20						
Environmental conditions	Overpressure category III, Pollution level 2						
Power reduced with max. temperature	1% for every 1°C increase in the maximum temperature						
Maximum height for mounting	Up to 1000 m						
Power reduced with max. height	0.5% for every 100 m over 1000 m.						
Humidity	93% maximum without condensation						
Maximum cycles per hour (3 x I nom, 10 sec)	90/h	60/h	30/h	60/h	40/h	30/h	20/h
Weight in kg.	0.4			1.0			
Measurements	Width (W) mm	45			45		52.5
	Height (H) mm	73			173		178
	Depth (D) mm	122			152		158
Assembly	Fixing A x B			On DIN guide rail			

VSD3/A-RFT VSD1/A-RFM

Variable speed drives for AC motors

Features:

- Converter for varying the speed, via voltage and frequency, of axial and centrifugal fans with asynchronous three-phase motors
- Converter power supply:
 - . Single-phase (VSD1/A-RFM): 200-240V 50/60 Hz
 - . Three-phase (VSD3/A-RFT): 380-480V 50/60 Hz
- Compliant with the Electromagnetic Compatibility Directive 2004/108/EC, the Low Voltage Directive 2006/95/EC and the Safety of Machinery Directive 2006/42/EC.
- Compliant with the following standards: EN 61800-3:2004: Adjustable speed electrical power drive systems. Product standard regarding EMC requirements and specific test methods. EN 61800-5-1:2003: Adjustable speed electrical power drive systems. Safety requirements. Electrical, thermal and energy. EN 60204-1:2006: Safety of Machinery. Electrical Equipment of Machines. General requirements. EN 55011:2007: Industrial, scientific and medical (ISM) radio-frequency Equipment. Electromagnetic disturbance characteristics. Limits and methods of measurement. EN 60529:1992: Specifications for degrees of protection provided by enclosures.
- On/Off input to enable/disable the variable speed drive.
- 0-10V input for speed control.
- Connection available to ModBus RTU bus.
- Standard model with degree of protection IP20. Also available in IP66 version up to 10 HP.

1 In general, all SODECA fans with a three-phase motor under normal operating conditions are suitable for working with power supplied by a static frequency converter (in accordance with IEC 60034-17). Nevertheless, some motors require special measures. The maximum operating frequency or speed must never exceed that for which the fan has been designed. In applications with quadratic torques such as fans and pumps, when the speed varies the absorbed power is directly proportional to the cube of the rotating speed: $P_{a2} = P_{a1} (n_2 / n_1)^3$

2 The insulation of motors coupled to fans is sufficient to work without restrictions with a frequency converter up to electrical supplies of < 500 V. The use of sinusoidal filters at the converter output will help the motor to operate properly, reducing breakdowns and increasing the fan's service life. It is recommended that motors of sizes > 225 be ordered with special windings to work with a frequency converter.

3 The length of the wires running from the converter to the fan have a particular influence on voltage characteristics at the motor terminals. The definition of "long wires" will depend on the nominal value and the converter type. The manufacturer's technical documentation must be consulted.

4 Ex-d flame-resistant motors must be ordered for operation using a frequency converter. The motor manufacturer will request information about the application via a questionnaire in order to establish the working parameters. These motors must also be fitted with PTC probes.

5 Ex-e increased safety motors cannot be operated with a frequency converter (a joint motor-converter certification would be required for this).

VSD1/A-RFM

KME - 10K

External control kit for On/Off and velocity control for VSD1/A-RFM and VSD3/A-RFT frequency converters

Features:

- On/Off by button
- Display by means of LED of the position of On or Off
- Memory of the latest position for speed regulation
- Possibility of installation on the surface or built-in

GMP

Electrical starter panel and protection of fans with three-phase motor, with On/Off buttons

Features:

- On/Off by button
- Incorporates fully-cabled contactor and adjustable thermal relay for protection of the motor
- The Off button is used to reset the thermal relay, in case it should go off due to overload
- For assembly on the surface, IP-55 protection

For fan with three-phase motor 230V

Model	Current of regulation (A)	Power motor 3x400V (kW)
GMP-0.2-0.33/230	1.2-1.8	0.25

GMM

Electrical starter panel and protection from overload and short-circuits of fans with three-phase motor, with rotary controls

Features:

- On/Off by means of a rotary control with the possibility of blocking with three locks
- Incorporates adjustable thermal relay for protection from overload and short-circuit
- For assembly on the surface, IP-55 protection

For fan with three-phase motor 400V

Model	Current of regulation (A)	Power motor 3x400V (kW)

AET

Electrical starter panel, star / triangle and protection of fans with three-phase motor, with On/Off buttons

Features:

- On/Off by button
- Display of condition by means of luminous pilot lights
- Incorporates adjustable thermal relay for protection of the motor
- Fully cabled
- Metal plate for assembly on the surface, IP-65 protection

For fan with three-phase motor 230V/400V.
Power supply 3x230V

Model	Current regulation of thermal relay (A)	Power motor 3x230/400V (kW)

AD Electrical starter panel and protection of fans with three-phase motor, with two DAHLANDER speeds

Features:

- Switch for selecting speed (1-0-2), Low-Off-High.
- Display of condition by means of luminous pilot lights
- Incorporates adjustable thermal relay for protection of the motor
- Fully cabled
- Metal plate for assembly on the surface, IP-65 protection

For fan with three-phase 400V Dahlander motor.
Power supply 3x400V+N

PL Plastic backdraught louver.

Features:

- The backdraught louver is adapted directly to the wall where the fan is mounted.
- Opening through excess pressure due to airflow
- Closed when the fan is on standby
- Made from plastic
- Maximum recommended speed 12m/sec for models 80,90 and 100

P Aluminium backdraught louver, spark-proof build

Features:

- The backdraught louver is adapted directly to the wall where the fan is mounted.
- Opening through excess pressure due to airflow
- Closed when the fan is on standby
- Aluminium sheet construction
- Maximum recommended speed 18m/sec for models 90 and 100

*Nominal diameter for pipe.

PS Support stands for long-cased fans.

Features:

- When fixed to the flange, it allows the fan to be fixed to flat surfaces.

Intelligent sensors for controlling the fans

Sensors which make it possible to sense certain environmental conditions and automatically start up the fans. This makes it possible to use the ventilation only when necessary. Using the sensors with the frequency inverters we can control the regime of operation of the fans, thus preventing the fan always working at its maximum consumption. These systems involve a significant energy saving.

SI-PIR-TF-Cenital

SI-PIR-TF-Mural

SI-PIR

Motion detector

Automatically activates the ventilation system when it detects the presence of people within its radius of action and keeps functioning for a pre-set time, which can be adjusted by means of an internal clock

Model	Power supply	Output	Detection angle	Adjustments	Height installation	Working temperature
SI-PIR	230V	230V	360°C	Timing 5s-30 min	2.4-4.2 m	-20° +50° C
SI-PIR-TFT-550-B	24V ac/24V dc	24V ac/24V dc	110°C	Timing 5s-30 min	1.8-3.6 m	-20° +50° C
SI-PIR-TF-25-360	24V ac/24V dc	24V ac/24V dc	360°C	Timing 10s-30 min	2.4-4.2 m	-20° +50° C

SI-SMOKE

Tobacco smoke detector

Automatically activates the ventilation system when tobacco smoke and other contaminants exceed the pre-set value in the sensor and keeps functioning for a pre-set time, which can be adjusted by means of an internal clock

Model	Power supply	Output	Maximum current (A)	Adjustments	Height installation	Working temperature
SI-SMOKE	220-240V ac	220-240V ac	3.0	Timing 3min-20 min	1.5-2.0 m	-20° +50° C

SI-CO2

Air quality detector

Automatically activates the ventilation system when the increase in contamination, as a function of the occupation of the premises, exceeds the pre-set value

Model	Power supply	Output	Consumption (W)	Adjustments	Height installation	Working temperature
SI-CO2-GAQ24	24V ac	0-10V ac	5	Timing 10s-30 min	1.5-2.5 m	-20° +50° C

SI-CO2 IND

CO2 sensor

Model	Power supply	Output	Maximum consumption (VA)	CO2 concentration range	Working temperature
SI-CO2 IND/P	15-24V ac ±10 %/18-34V dc	0-10V dc/0-20mA	2.5	0-2000 ppm	-10 +50 °C
SI-CO2 IND/C	15-24V ac ±10 %/18-34V dc	0-10V dc/0-20mA	2.5	0-2000 ppm	0 +50 °C

SI-TEMP

Temperature sensor

Automatically activates the ventilation system when it detects a temperature greater than the pre-set value. Once the environmental temperature has descended below the pre-set point, the fan remains functioning for a pre-set period, which can be adjusted by means of the internal clock. The range of temperature oscillates between +10°C and 40°C

Model	Power supply	Output	Maximum current (A)	Adjustments	Height installation	Working temperature
SI-TEMP	220-240V ac	220-240V ac	3.0	Timing 3min-20 min	1.5-2.0 m	+10° +40° C

SI TEMP IND

Proportional temperature sensor

Model	Power supply	Output	Maximum consumption (VA)	Working temperature
SI-TEMP IND/P	15-24V ac ±10 %/18-34V dc	0-10V dc/0-20mA	1.5	0 +50 °C

SI-TEMP+HUMEDAD

Temperature and relative humidity sensor with display

Independently controls the temperature and the relative humidity of the air on the premises. Automatically activates the ventilation system when it detects a temperature or humidity greater than the pre-set value. Once the environmental temperature or humidity has descended below the pre-set point, the fan remains functioning for a pre-set period, which can be adjusted by means of the internal clock.

Model	Power supply	Output	Adjustments	Height installation	Working temperature
SI-TEMP+HUMEDAD	24V ac	0-10V dc	$\Delta T = 0.5^{\circ}\text{C}$ y $\Delta \text{HR} = 2\%$	1.5-2.5 m	+10° +40° C

SI-HUMIDOSTATO

Humidity sensor

Model	Power supply	Output	Maximum consumption (VA)	Relative humidity range	Working temperature
SI-HUMIDOSTATO	15-24V ac ±10 %/18-34V dc	220-240V ac	2	0-100 % RH	0 +50 °C

SI-HUMEDAD

Proportional humidity sensor

Model	Power supply	Output	Maximum consumption (VA)	Relative humidity range	Working temperature
SI-HUMEDAD	15-24V ac ±10 %/18-34V dc	0-10V dc/0-20mA	2.5	0-100 % RH	0 +50 °C

SI-PRESIÓN

Pressure transmission unit

Controls the pressure in facilities with constant pressure ventilation, and transforms it into an electrical signal to regulate the ventilation system and constantly maintain the same pressure

Model	Power supply	Output	Maximum consumption (VA)	Connectors	Pressure range
SI-PRESIÓN TPDA	24V ac/24V dc	0-10V/4-20mA	4	6.2 mm	0-2500 Pa
SI-PRESIÓN TPDA c/DISPLAY	24V ac/24V dc	0-10V/4-20mA	4	6.2 mm	0-2500 Pa

SI-TIMER

Timer

Adjusts the operating time of the ventilation system to which it is connected. The ventilation system is automatically activated when the light switch goes on and continues to function for a pre-set time which can be altered by means of the internal clock

Model	Power supply	Output	Maximum current (A)	Adjustments	Working temperature
SI-TIMER	220-240V ac	220-240V dc	3.0	Timing 3min-20 min	-20° +50° C

SI-FUENTE DE ALIMENTACIÓN ac

SI-FUENTE DE ALIMENTACIÓN dc

SI-FUENTE DE ALIMENTACIÓN

Power supply 24V dc / ac

Powers the intelligent 24V dc/ac sensors from an input voltage of 230V. single-phase

Model	Power supply	Output	Installed (VA)
SI-FUENTE DE ALIMENTACIÓN dc	230 V	24V dc	30
SI-FUENTE DE ALIMENTACIÓN ac	230/400 V	24/48V ac	25

CENTRAL CO

Monoxide detection centres for ventilation control in car parks

Model	Aplicación
FMC-C-501	Centre for 1 area
FMC-C-502	Centre for 2 area
FMC-C-503	Centre for 3 area
FM-M-509	Module for area extension
FM-DP500	CO wall detector
FM-D500	CO ceiling detector
FM-TC500	Control card per inverter
